Continuation of 3. NOTE: The added limitation "comprising a receiving area" in the "shaped applicator" in independent claim 11, which limitation was not present in original claim 3 (where the shaped applicator was derived) requires further consideration and search. It is noted that line 13, i.e. "a shaped applicator comprising a receiving area", which was newly added, should have been underlined in the presently amended claim.

Continuation of 11. does NOT place the application in condition for allowance because: of the same reasons as set forth in the final rejection. Applicants argue that the present claims require a shaped applicator, originally the limitation of currently cancelled claim 3, is not addressed in the present office action. Applicants also argue that a shaped applicator can surprisingly provide significantly improved results and ease of use as compared to a normal applicator as described in the specification at page 11, lines 23-24 (of the substitute specification), and neither Petri nor Pritchett teaches or suggests the employment of the shaped applicator.

The Examiner respectfully disagrees with the above arguments because in the office action dated 09/04/08, it is stated that Petri teaches manually operated foam trigger-type dispensers (col. 16, lines 23-44), which dispenser read on "shaped applicator" of then claim 3. In addition, in the same office action, it is stated that Petri teaches that the microemulsion may also be executed in the form of wipes (see col. 16, lines 60-64), which also read on "shaped applicator" of then claim 3. The present amended claim 11, added a new limitation which reicites " a shaped applicator comprising a receiving area". Please note that "a receiving area" is newly added in this claim, and is not present in original claim 3.
